

ANTALIS PACKAGING EASY REFERENCE GUIDE

PACKAGING

Whether you are packing, protecting, storing, dispatching or transporting – Antalis has the right packaging product for you.

We understand that when goods are moved around they should remain in perfect condition throughout the entire production, transportation and storage chain.

Antalis can offer you a **vast selection** of packaging products. Whether you need cartons, brown wrapping paper or bubble film from well established brands including Scotch, Eskaboard and Jiffy, we have them all.

Our team of **packaging experts** can work closely with your company to appraise your needs, analyse your procurement policy and recommend solutions and products to your specific requirements.

In addition we can also provide:

- Extensive product range.
- Next day delivery for orders placed by 6.00pm.
- Knowledgeable sales team with market expertise.
- UK coverage.
- Expertise in key issues that affect the packaging industry, including Packaging Waste Legislation and the Food Hygiene Standard.

We supply a wide range of instantly recognisable brand names, along with our own branded range of Masterline products including tape, bubble film and wrapping papers.

The scope, diversity and quality of our products enable us to satisfy all of your demands. We can even offer you products not listed in our catalogue and create customised solutions.

MACHINES

STRETCH WRAP

Whenever selecting film, the following variables should be taken into account:

Type of product

Stretch film type is dependent on what you are wrapping. Lighter, more fragile goods require a lower gauge of film to avoid being crushed than do heavier, more solid goods that can withstand the pressure of higher gauges.

Type of load

There are two factors that determine load type – the weight of the load and the uniformity of its outside surface. Examples of different load types are shown below:

Type of equipment

Machine stretch levels will help determine what type of film is necessary to wrap a load. Whereas higher gauges were once required for machines with high pre-stretch levels, today we are selling thinner, tougher films which are able to endure greater levels of stretch while maintaining their strength.

<p>'A' Loads have no irregularities</p>		<p>'B' Loads have protrusions up to 100mm</p>		<p>'C' Loads have protrusions over 100mm</p>	
---	---	---	---	--	---

CARTONS

When measuring a box, the dimensions are given in the following order:-

length x breadth x height

(all measurements are internal)

Single Wall Corrugated Cardboard consists of one fluted medium between two sheets of linerboard

Double Wall has two fluted mediums sandwiched between three sheets of linerboard

Single wall

Double wall

Box Styles are what we use to describe what style of box you might need. We use the industry-standard codes for different box styles, for example, the most popular Box style is 0201 which is a type of box you are fairly used to seeing - it has two outer flaps that meet in the middle top & bottom to tape

Fefco style 0201
Regular lap end case

Fefco style 0402
Corner cut folder

Fefco style 0211
Tuck in top and bottom

Fefco style 0421
Folding box with locking sides

Fefco style 0215
Tuck in top

Fefco style 0203
Regular lap end case fully overlapping flaps

USEFUL INFORMATION

PAPER PRODUCTS

From corrugated paper to a range of kraft rolls and tissue sheets.

Single Faced Corrugated Paper

- Bonded laminate of smooth and fluted paper
- 100% recycled material and 100% recyclable
- Lightweight, easy to handle and cost effective

Kraft Paper Sheets & Rolls

- Recycled kraft made from 100% recycled material
- Imitation kraft is a cost effective alternative to pure kraft
- Suitable for medium and heavy duty applications where burst strength is required

Tissue Sheets

- Acid free tissue sheets contain a high percentage of recycled waste, for delicate products that need chemically inert primary wrapping
- Helps to avoid product tarnishing
- Retains strength and suppleness

TAPES

We provide a wide range of sealing tapes manufactured from a variety of materials and available in different strengths and sizes. Our polypropylene packaging tapes are the most popular, however we also supply a variety of vinyl and paper tapes.

POSTAL PRODUCTS

Jiffy bags need little introduction – they're a postal packaging household name, and Jiffy's range of postal bags remains unrivalled in terms of strength and performance. We also provide polythene postal packaging bags, rigid envelopes and versatile postal tubes to meet the needs of our customers.

CUSHIONING

Bubble film is one of the most recognised protective packaging products on the market. Air bubble film offers an economical, effective solution for void filling, interleaving, wrapping and cushioning.

Packaging Foam is one of the more versatile packaging materials in use today. Low-density polyethylene is extruded to form thousands of tiny cells, each full of air and each cell combining to form a non cross-linked foam.

- Small - Protects against marring and scratching of delicate and vulnerable surfaces
- Large - Very versatile for cushioning a wide variety of products

STRAPPING

Polypropylene tensional strapping is a safe and secure method of sealing your boxes or securing your pallets. Hand strapping is available either on a cardboard core or a plastic reel. We also offer a wide range of machine strapping for customers with semi or fully automatic strapping machines.

Polyester strapping is a great alternative to steel strapping, its excellent recovery properties help a load absorb impacts without the straps breaking.

We stock an extensive range of boxes including single wall, double wall and stationery boxes suitable for letterheads, compliment slips and business cards.

This economical range is ideal for protecting goods in transit, supplied flat for easy storage. If you have requirements for "made to measure" bespoke size boxes or boxes printed with your logo, then please speak to one of our sales advisors who will be more than happy to help.

SINGLE WALL BOXES

Brown single wall cartons, made from high quality corrugated board for strength and durability. Ideal for packaging, transport and storing a wide range of products.
